TECHNICAL SKILLS

PROGRAMMING

- C, C++ (Procedural)
- Java (OOP)
- Python
- C# (Basics)
- SQL
- Web: HTML, CSS, JavaScript, PHP

EMBEDDED & HARDWARE

- FPGA (Design & Implementation)
- Verilog
- ATmega328P (Bare-metal programming)
- Arduino
- Sensors / Actuators

TOOLS & PLATFORMS

- Matlab, Simulink
- Git
- Linux / Unix
- limactl, QEMU, UTM
- VMware, VirtualBox, WSL

CYBERSECURITY

- Network Security
- CTF Methodologies
- Forensics, OSINT
- Vulnerability Assessment basics

LANGUAGES

Italian	Native
English	B2
French	A2

PROFESSIONAL SUMMARY

Second-year Electronic, Computer and Telecommunications Engineering student with a strong interest in embedded systems, IoT and cybersecurity.

Through international mobility experiences, competitive cybersecurity programs and hands-on hardware projects, I have developed a practical approach to engineering and collaborative problem solving.

I am currently seeking an Erasmus+ Traineeship to contribute to research and development activities while completing my Bachelor's thesis.

EDUCATION

B.Sc. in Electronic, Computer and Telecommunications Engineering

University of Cagliari

Sept 2024 – Present

Expected Graduation: 2027

- Relevant Coursework: Digital Systems Design, Programming (C/C++), Circuit Theory.

Erasmus+ Short-term Mobility (EDUC Alliance)

ENSSAT – Université de Rennes (FR)

2026

- Completed a 4-ECTS intensive program on IoT Systems.

High School Diploma in Computer Science & Telecommunications

IIS Asproni-Fermi

June 2024

Grade: 100/100

PROJECTS

IoT Smart Parking System | ENSSAT, Rennes

Developed an automated parking prototype using IoT protocols, sensor integration, and self-sustaining systems (solar panels).

Digital Systems Lab | University Project

Implemented digital logic and system architectures using FPGA (Nexys 50T) and ATmega328P microcontrollers.

ARM-x86 Compatibility Research | Personal Project

Documented workarounds for running x86 legacy software on ARM64 (Apple Silicon) via virtualization and emulation layers.

COMPETITIONS & ACTIVITIES

- Selected for CyberChallenge.IT national training program (2024).
- Participated in **Olicyber** (Italian Cybersecurity Olympiads) regional competitions in 2023 and 2024.
- Finalist at **Cybertrials** national competition in Turin (June 2024).
- Participated in **ECSC Female Bootcamp** (Turin, Oct 2024) – Focus on hardware security (GPIO cracking via MicroPython) and cryptography.
- Active CTF player in the Srdnlen team (University of Cagliari).

ADDITIONAL INFORMATION

Problem Solving

Teamwork

Adaptability

Curiosity

Motivation

Open to international experiences and relocation.

Available for Erasmus+ Traineeship starting from **2026**.
